Summit Data Communications Wins Leading EDGE Award

Recognized as value-creating company in Northeast Ohio

Akron Ohio, May 24, 2010 – Summit Data Communications, Inc., the leader in embedded Wi-Fi® solutions for business-critical mobile devices, has been selected as a 2010 recipient of the Crain’s Leading EDGE Award. This prestigious award was created by Entrepreneurs EDGE (Economic Development through Growth & Entrepreneurship) to recognize value-creating, middle-market companies in Northeast Ohio.

EDGE (www.edgef.org) is an organization that enhances economic development in Northeast Ohio through innovation and entrepreneurship. EDGE helps value-creating companies succeed through education, innovation, and relationship-building, while cultivating a culture that is supportive of entrepreneurial ventures. An EDGE metric identifies the Northeast Ohio companies that are creating the most value for themselves and their communities.

“Northeast Ohio is our home, and we are dedicated to creating value here,” said Chris Bolinger, Summit’s VP of Sales and Marketing. “By providing market-leading products and high service levels to a worldwide customer base, we are creating rewarding jobs not just at Summit but at partner companies in our region.”

Last year, in the teeth of the recession, Summit increased staff by 30%. This year, Summit is continuing to grow by addressing customer requirements for reliable and secure Wi-Fi connectivity in challenging environments around the world.

About Summit

Summit Data Communications, Inc. is the *mobile* in today’s mobile computers and other business-critical mobile devices. Summit’s embedded Wi-Fi solutions provide secure, reliable connections in the challenging environments in which business-critical mobile devices operate, including factories, warehouses, ports, hospitals, and retail stores.

Wi-Fi® is a registered trademark of the Wi-Fi Alliance.
