

Summit Data Communications, Inc.
50 South Main Street Suite 1100
Akron, OH 44308 USA

To Whom It May Concern:

In order to better serve our customers, Summit Data Communications makes available multiple versions of the same core product. These versions typically provide for alternative physical interfaces and/or multiple antenna options. In all cases, the radio performance of the various versions is identical to the radio performance of the core product.

As such, and where applicable, Summit uses the certifications, grants, approvals, and other related items of the core product for the various versions of that core product.

The following table describes each originally-certified Summit device and the Summit devices that fall under these certifications.
